

Jonatan Elias Vargas Ortiz

Frontend Developer — React, TypeScript & PHP

Spain contact@vaor.dev [linkedin.com/in/vaor](https://www.linkedin.com/in/vaor) github.com/vaorme

Valid work permit in Spain

Summary

Frontend developer based in Spain, specialized in React with strong backend skills in PHP, Laravel, and Python. Experienced with databases such as PostgreSQL, MongoDB, Firebase, and Supabase. I also build integrations and automation workflows using Make.com and Telegram bots to optimize real-world operations.

Experience

Semi-Senior Developer

Aug 2024 — Present

LinkTIC

- Developed new modules and features for a production PHP application
- Provided personalized support and maintenance for the live application
- Collaborated with a multidisciplinary team using Azure DevOps and Git branching workflows
- Worked with frontend teams using Quasar.dev (Vue.js) to build and maintain the UI
- Prepared feature branches for production deployments following change control processes

Web Developer

2023 — 2024

Código Dinámico

- Built and maintained WordPress websites with custom functionality
- Developed interactive animations and dynamic frontend features
- Provided direct client support and custom development solutions

Web Developer

2020 — 2023

Desarrollandolo

- Built custom PHP websites, e-commerce stores (Shopify), and landing pages (Wix) for multiple clients
- Developed dynamic video content using Remotion.dev
- Worked directly with clients gathering requirements, providing support, and delivering custom solutions
- Gained experience with multiple database systems: MySQL, PostgreSQL, MongoDB, and Firebase

Junior Developer

2018 — 2020

PHPost

- Learned PHP (with Smarty), HTML, CSS, jQuery, JavaScript, and MySQL by building on a real CMS platform
- Created custom layouts and features for online communities as free work to build experience
- Developed problem-solving skills by building and debugging features from scratch
